To

The Collector,
Madak District.

Sir,

Sub : Grievances of Kajipally villagers.

We are submitting herewith the following few lines for your kind consideration and early orders in the matter for redressing our grievances.

Due to failure of rains in our villages all the normal works and lives of the villagers are stand still. No human activity is visible in our village. We, all the villagers are depends on the agriculture. Even the eatables and other commodities are not being properly sold in our villages. For supply the rice to this drought area, the Tahsil Office has recommended for purchasing Rice from the Fair Price Shop of Madavaram. But that village is located too distant from our village. Moreover, Bollaram villagers and Kistiahpally villagers are approached concerned authorities for the location a Fair Price Shop at Kajipally for supplying the rice to three villages namely, Kajipally, Bollaram, Kistiahpally. The population residing in these three villages are more than 1,500 which is minimum requirement for location of a Fair Price Shop and the three villages comes under a Panchayat only. Hence we are earnestly request for the sanction of a Fair Price Shop at Kajipally for over coming the difficulties.

In our village, since the birth Independent Hyderabad State, we are not seen a development work from the Welfare of the people of this Great democratic country. Our village is located near to Hyderabad, but it is not having road like. The road is available upto Mallampet and the half road was constructed from Mallampet to our village. Why road work was stopped? it is not known to us. Some times

continued..2

we feel that we are living in the other village world
which is entirely different from Indian Union. If authorities
 are not having any discrimination regarding our village,
 why the works are stopped in the middle.

Hence, in this difficult situation it is the
 favourable situation starting the road work, which stopped
 in middle. If the road work has started, we may have some
 earnings and have at least one time meals to us and our
 children.

Regarding the supply of Electricity, our nine
 neighbour village which are only in the distant of 3 miles are
 having electricity supply, whereas our villages are not
 even getting kerosene for lighting their houses. We hope
 that the Electricity may be arranged to be supplied in some
 months for starting our new life, if god gives some rains
 to our misfortune Drought Area.

This border area of Madak District with a
population 1,200 is not having a single room for school.

Hence, we all request the Government in this
 critical Drought Stricken situation for kindly starting the
 road work which was stopped in the middle and Dharai Cheru
 work which also stopped in middle may also be taken up.
 If the Bandan, the ayscut of Dharai Cheru is completed,
 we may irrigate more acres. Pellronkunta work also stopped
 in middle, that work also may be taken up for the direction
 of completion.

It is also requested for sending a Government
 deputation for measuring the Drought situation in our village
 and we may be given some kind of drought relief fund to
 our village.

continued..3

3.

We are hoping that in the Silver Jubilee Year of our Republic Day all the grievances above said and not concerned in this representation may be redressed with kind humanitarian consideration.

We are expecting early actions of the above work.

Yours faithfully,
ALL THE VILLAGERS OF KADAPALI.

Date 25-8-1971.

COPY submitted to Block Development Officer, Narasapur, Medak for necessary action and favourable orders.

COPY submitted to the Tahsildar, Narasapur Ta.ug, Medak District for information and favourable consideration.

COPY submitted to the Deputy Chief Minister, Andhra Pradesh, Hyderabad for favourable orders.
